

Important Information for Internet Explorer 7 (IE7) Users regarding Pay.Gov:

1. Pay.gov only supports Internet Explorer versions 5.5 to v.6.1, and Firefox v.1.2 to v.1.5. CM/ECF has also not yet been certified to work with Internet Explorer v.7.
2. Should you already have IE v. 7 installed, you will have to modify the configuration in order to use Pay.gov. You will need to make three changes, all of which can be found under the Tools menu in the upper-right corner of your browser:

Under Tools, select Internet Options. Within Internet Options, select the Advanced tab. The three changes that you will need to make here are:

- 2.1. Under "Phishing Filter", select "Disable Phishing Filter"
- 2.2. Uncheck "Warn about certificate address mismatch"
- 2.3. Uncheck "Warn if changing between secure and not secure mode"

3. You must close and restart Internet Explorer for these changes to take effect. Once you've completed that step, you may process payments through Pay.gov with IE v.7.
