

SPLITTING PDF DOCUMENTS INTO MULTIPLE DOCUMENTS WITH ACROBAT 6

The **Extract Pages** Tool provides simple way to split a PDF document into two or more separate PDF files with Adobe Acrobat Professional. You can extract pages from an existing PDF document and use them as the basis for a new PDF document or several documents. When you extract pages, you can preserve the extracted pages in the original document or delete them. To extract pages from a PDF document, follow these steps:

1. Open the PDF document that contains the pages you want to extract.
2. Choose Document | Pages | Extract to open the "Extract Pages" dialog box, as shown here:

3. Specify a range of pages by entering page numbers in the From [] and To [] fields.
4. Click the "Delete Pages After Extracting" checkbox to have Acrobat delete the pages from the original document when they are extracted.
5. Click OK to extract the pages, and Acrobat opens the extracted pages as a new document.
6. Choose File | Save As and then specify a filename and location where you want the extracted pages saved as a new PDF file.
